

Nahla Abdalla

CPHD, MSc

Key Project Experience:

- Octopus Real Estate
Net-Zero Care Home Strategy
- PLP
BREEAM Strategy – Ellesmere Port
- Wrenbridge
Life Cycle Carbon Assessment – Premier Inn, Cambridge

Nahla has a master's degree in Sustainable Building Technology with a background in Architectural Design and has a passion for promoting sustainability in the built environment.

Originally qualifying as an architect from the University of Khartoum, Nahla developed a keen interest in sustainability through her post-graduate career as an architectural designer. This led her to completing a Masters in Sustainable Building Technology from the University of Nottingham.

Whilst studying in Nottingham, Nahla qualified as a Certified Passive House Designer, obtaining skills in delivering low-energy and efficient dwellings, as well as obtaining her BREEAM Associate certificate to further her knowledge in sustainability assessment methods.

Nahla's skillset background in architecture allows her deliver sustainability consultancy through a unique lens, working collaboratively with design teams to ensure the solutions put forward are effective, practical and implementable.

She is also trained in several 3D and energy modelling software including CAD, Energy Plus, and Design Builder.

Nahla has joined Envision to work on a wide range of projects, including BREEAM, energy modelling, and whole life cycle carbon assessments all while advancing her professional development.
