As a director of Envision, Mark is a Chartered Building Services Engineer providing technical expertise in the design of mechanical and electrical building services and the use of energy in buildings.

With over 21 years' experience in the building services industry, Mark is a fully qualified CIBSE Low Carbon Consultant and a full member of the Institute of Refrigeration. Mark is an all-round building services engineer, although has specialised as a mechanical services and refrigeration consultant working in the industrial, commercial and residential sectors.

Mark has overall responsibility for conceptual, technical and the detailed design of building services engineering systems, and the production of building energy assessments and reports both for planning and for the discharge of planning conditions.

Integral to his role is full responsibility for the day to day management of all Envision's building services engineers, technicians and consultant design team personnel. Mark is also responsible for ensuring that designs are fully compliant with latest standards and regulations particularly concentrating on Approved Document L compliance.

Mark provides design and consultancy services throughout the entire development process – from the initial planning stage, through the various stages of the design and construction process, and onto the handover phase, thereby ensuring consistent Director-led involvement on major projects.
