Use*

Charlotte has a strong grasp of sustainability principles, developed through her extensive consultancy experience, advising developers at both a strategic level and detailed design, achieving numerous positive outcomes.

A qualified BREEAM assessor for over 10 years, Charlotte was one of the first to achieve BREEAM Accredited Professional status.

Specialising in complex assessments, including bespoke, multi-residential and international assessments, as well as advising on BREEAM strategies across large scale mixed use developments, Charlotte has a good understanding of the requirements of other recognised sustainability assessment methodologies, advising clients in the application CEEQUAL and LEED.

Charlotte is working with design teams to understand the multi-functional benefits of sustainable design and the impact of good design on both the environment and the people who occupy the buildings. In this context, Charlotte is advising clients on the principles of the new WELL standard and health and wellbeing in new developments.
